	Water soluble (Zn)	0.034%
	Zinc EDTA (Zn)	0.034%

## Description

Agroleaf® Power Calcium is your go-to water-soluble foliar feed to prevent and correct calcium deficiency due to excess evaporation. It's also great for keeping calcium-hungry crops such as lettuce, cabbage and fruits topped up with the nutrient, especially during fruit/vegetable developing stages. Power Calcium strengthens cell walls and contains a high amount of potassium, which increases fruit size. Offering a superb foliar uptake, it prolongs the availability of microelements and prevents fruits from bursting, extending their shelf life. Made from the purest raw materials, Power Calcium dissolves rapidly and can deliver results in as little as 24 hours.

## Benefits

- \\ Prevents and corrects calcium deficiencies
- \\ Increases fruit size
- \\ Prevents fruit from bursting and extends shelf life

## How to use

- 1 Apply under high pressure.
- 2 Can be mixed with many fungicides/insecticides. Ask your distributor for information.
- 3 For all mixes with chemicals, do a small trial before using on a large scale. Check response in 2 or 3 days.
- 4 Avoid spraying in periods of unfavorable conditions (for example bright sunlight, high midday temperatures, and high evaporation periods).
- 5 If you need more information, please contact your technical support.

## Application rates

---

Dissolve 3-5 kg in 200-1000 liters of water per hectare for outdoor applications. A 0.3% solution is recommended for greenhouse application.

Trail first on a small scale before changing the rate, or any other variables, As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
