## SaltSmart

The smart way to face the challenges of saline issues

## Description

If you're facing a high salt situation, reach for the H2Pro<sup>®</sup> SaltSmart. This unique wetting agent effectively flushes salts from your turf's rootzone. Ideal if you're at the coast, irrigating with reclaimed water, or suffering from high evaporation and low rainfall. You can use it all year to eliminate saline issues and improve water movement through the soil, making growing conditions much easier. Its calcium macro-polymer component will flush water through your turf's roots into the drainage system, replacing problem salts with calcium, increasing calcium base saturation proportion on your cation exchange complex.

## Benefits

- \\ Improves conditions in high salt situations
- \\ Flushes salts from the rootzone
- \\ Helps water move through soil

## How to use

- 1 Application timings: monthly.
- 2 If you need more information, please contact your technical support.

## Application rates

---

Application rate	20-60 L/ha
Water volume	800-1000 liters

---
